Work Experience

• Infosys

Having 2 years experience in Manual as well as automation Testing using Selenium-java tool, also working on Appian-Selenium low code automation framework.

Projects Experiences

• Resolve complaint creation

This application helps bankers to solve the customer concern

To create manual as well as Automated test cases using the Selenium automation tool. Running end-to-end regression automation scenarios in SIT. Fixing automated test cases after business requirement changes. Finding defects using the manual as well as Automation test cases.

• Estate Management tool

This application helps the banker to maintain the details of the deceased customers and close their accounts and other banking-related activities.

Working on this project from scratch. Understanding the exact business requirement and writing down the manual test cases and doing the execution in ST and SIT environments. Also automating test cases using Appian-Selenium low code testing tool. Fixing & maintaining the test scripts as per the latest business requirements. Finding bugs and retesting after bugs got fixed. Helping team with automation script-related issues.
